KORUPOLU SAI PRIYA

Aspiring Mobile App Developer (Flutter | Dart)

saipriyakorupolu@gmail.com | +91 8179516667 | GitHub | LinkedIn | LeetCode | HackerRank

SUMMARY

Final-year AI & ML engineering student with hands-on Flutter/Dart development experience across three shipped-quality projects, including a computer-vision-integrated mobile dashboard. Comfortable connecting mobile apps to REST APIs and backend services, with a working foundation in Git/GitHub workflows. Currently deepening skills in device-hardware integration and secure mobile authentication.

SKILLS

Mobile & Languages: Flutter, Dart, Java, Python, C, SQL

Backend & Integration: REST APIs, Flask, MongoDB, Firebase, SQLite

Tools & Practices: Git, GitHub, ServiceNow, Postman, debugging & issue-tracking workflows

Also exposed to: OpenCV, YOLO (real-time detection), REST-based device/camera data pipelines

PROJECTS

Safe Campus — AI-Powered Campus Surveillance System | *Flutter Web, Flask, SQLite, OpenCV, YOLO*

- Built a Flutter dashboard that consumes live camera-feed data and instant alert notifications, directly analogous to integrating device-hardware (camera) input into a mobile front end.
- Implemented YOLO-based real-time detection for weapons and suspicious activity, processing continuous hardware input into actionable, low-latency alerts.
- Integrated Flask REST APIs and SQLite for incident logging and management, connecting the mobile/web client to backend services.

Rule-Based Ticket Assignment System | *ServiceNow, Python, REST API*

- Automated ticket routing using rule-based workflows with priority and skill-based logic — conceptually similar to role-based access/assignment (RBAC) logic.
- Built and consumed REST APIs for ticket operations, reducing manual effort and improving workload distribution.

Humoji — Emoji-Based Music Selection App | *Flutter, Dart, UI/UX Design*

- Designed multiple language-based screens with dynamic navigation and state-driven UI updates in Flutter.
- Built an intuitive, gesture-friendly interaction model, applying core Flutter widget and navigation patterns used in production cross-platform apps.

INTERNSHIP EXPERIENCE

Mobile App Development Intern — Technical Hub Pvt Ltd

- Developed responsive Flutter/Dart mobile interfaces, working directly with widgets, navigation, and layout across screen sizes.
- Applied application development best practices in a collaborative team setting, coordinating on UI implementation.

ACHIEVEMENTS & CERTIFICATIONS

- MongoDB Certified Developer Associate — MongoDB
- Postman API Fundamentals — Student Expert Badge
- 5-star Java & SQL badges on HackerRank; 250+ problems solved on CodeChef
- GitHub Foundations (Microsoft) · Python Basic & SQL Intermediate (HackerRank) · Google Play Store (Google)

EDUCATION

B.Tech, AI & Machine Learning — Aditya College of Engineering & Technology, Surampalem

- 2023–2027 | CGPA: 8.24

Intermediate (MPC) — Narayana Junior College, Kakinada

- 2021–2023 | 85%
