PROJECT(S)

■ SAFE CAMPUS

Flutter Web | Flask | SQLite | OpenCV | YOLO

problem: Traditional campus surveillance systems require continuous human monitoring and delayed incident response.

- Developed an AI-powered campus surveillance system for real-time threat detection.
- Implemented YOLO for weapon and suspicious activity detection.
- Built a Flutter dashboard with instant alert notifications.
- Integrated Flask APIs and SQLite for incident management.

■ RULE BASED TICKET ASSIGNMENT SYSTEM

ServiceNow | Python | REST API

problem : Manual ticket routing reduces efficiency and increases response time

- Automated ticket assignment using ServiceNow rules and workflows.
- Implemented priority and skill-based routing.
- Used REST APIs for ticket operations.
- Improved workload distribution and reduced manual effort.

■ HUMOJI

Flutter | DART | UI/UX DESIGN

problem : Traditional music apps lack intuitive and fun ways to explore songs .

- Developed a emoji-based music selection app for better user interaction.
- Designed multiple language based screens with dynamic navigation.
- Created an engaging UI insipired by modern apps.
- Enhanced user experience with creative and interactive features.

ACHIEVEMENTS

- Postman API Fundamentals Student Expert Badge
- Acheived 5-star golden badges in Java,SQL on HackerRank
- Solved over 250+ programs on CodeChef.

INTERNSHIP

TECHNICAL HUB PVT LTD

- Gained practical experience in Flutter and Dart by developing responsive mobile application interfaces.
- Worked on UI implementation, navigation, widgets, and application development best practices.
